## **Windows 8 Mail Setup Guide**

These easy to follow guides provide step-by-step instructions on how to setup and troubleshoot your email program, with personalised screenshots providing visual examples to follow.

Your customised mail settings are as follows: Email: you@your-domain.com

Incoming (POP) server: mail.your-domain.com Outgoing (SMTP) server: smtp.your-domain.com Account / User Name: you@your-domain.com SMTP Authentication: On (same Username as POP)

SMTP Port: 587

**Note:** If SMTP Authentication is not catered for by your email program, you must rather use your ISP's SMTP server. (Vodacom 3G- smtp.vodacom.co.za or smtp.vodamail.co.za)

# Setting up a new account for Windows 8 Maill
